

AlertGPS ActiveHalo® safety wearable device

24/7 protection for your mobile workforce, wherever they are.

AlertGPS provides the quickest way to locate, communicate and get help to your mobile workforce.

One-touch SOS

The one-touch SOS button creates a two-way voice call with our award-winning 24/7 monitoring center to dispatch immediate emergency help anywhere in the United States.

Integrated safety solution

01 - Alert

Press the SOS button on the device or app to immediately initiate a voice call to our 24/7 Monitoring Center.

02 - Locate

The user's GPS location is instantly pinpointed and transmitted.

03 - Communicate

Our Monitoring Center agent answers the call and assesses the situation. Alerts are simultaneously sent to a designated member of your team to provide real-time situational awareness.

04 - Respond

Our highly trained agent dispatches emergency services and stays on the line providing reassurance until help arrives.

Innovative technology: The all-in-one safety solution

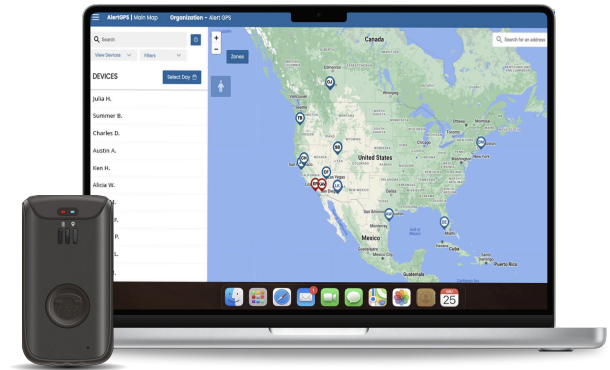

Our cloud-based IoT platform connects you with your mobile workforce, helping protect your employees and mitigate risks associated with working in uncontrolled environments.

Purpose-built safety wearable

Small and discreet device with one-touch SOS, advanced fall detection without call-back, a check-in button to report arrival/departure, an audible personal alarm, and much more.

Secure alerting platform

Our cloud-based platform facilitates the flow of information among the team responsible for worker safety. The customizable dashboard is highly intuitive, making it easy to set alerts, generate reports, and graphically display the current status of your workforce.

24/7 Monitoring Center

Our agents are trained to handle any emergency situation and can dispatch help (police, fire and EMT) anywhere in the United States. With companion mode, workers can initiate a call anytime they feel uneasy, for any reason. Our agent will stay on the line until they feel safe.
